## **DETAILED ACTION**

### ***Response to Arguments***

The applicant's response received 2-18-05 overcomes the examiner's prior art rejection. Hence **claims 1, 4-12, 15-21, 23-30, 32-43 and 45-55 are allowed.**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

1. As stated in previous actions, the independent claims recite highly specific design details which are not found in the prior art of record. For instance, claim 1 recites:

1 . A method of scheduling a plurality of users sharing use of an air interface in a wireless communication network, the method comprising:

calculating a scheduling metric for each user, said scheduling metric being dependent on a minimum data rate defined for the user;

defining the scheduling metrics such that assigning a higher minimum data rate value to a given user preferentially biases scheduling of that user:

defining the scheduling metrics such that a magnitude of the scheduling metric for each user depends on a differential value between an average served data rate of the user and the minimum data rate desired for the user; and

wherein users having smaller differential values are preferentially scheduled; and scheduling users based on the scheduling metrics.

As per the rejection, Fawaz teaches the bulk of the claim except for "further comprising defining the scheduling metrics such that assigning a higher minimum data rate value to a given user preferentially biases scheduling of that user". The examiner believes this combination to be novel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
